**Near Dispersion
of its World Famous
Shorthorn - -
Polled Shorthorn
Project**

**KINGSTON, ONTARIO
Monday, June 25, 1956**

160 Head -- 74 Shorthorns -- 86 Polled Shorthorns

Birmingham Dauntless 2d x. With all due respect to the excellent Polled Shorthorn bulls we have produced and sold to the four corners of the world, we feel that in Birmingham Dauntless 2d x, we have come closest to our goal of producing as good a Shorthorn as produced in Scotland, but with a Polled head. Study his pedigree (Reference Sire D). We believe there is no Polled Shorthorn bull in the world with as much Scotch breeding. When you see him, we are sure you will agree that he backs up his pedigree as an individual.

After an exhaustive search for a Polled Shorthorn herd sire, the Honorable E. H. Graham, Minister of Agriculture and Mr. W. J. B. Murphy, Head of Animal Industry for New South Wales, Australia, selected **Birmingham Nugget 3d x** to head up that government's Polled Shorthorn project. The decision was made in August, 1955. We were fortunate in that import regulations into Australia allowed us to keep this bull until February, 1955. We also made an agreement to keep a specified amount of frozen semen. This bull has proved a 100% dehorner. Six of his eight grand-parents are Scottish Shorthorns.

Birmingham Control — In striving to produce a Polled Shorthorn with the best blood of Scotland, we quickly came to the conclusion that one cannot produce a better Polled Shorthorn than the horned cattle from which they originate. We show Birmingham Control as an example of the excellence of our straight horned breeding, which is an important phase of our program. Study his pedigree under Reference Sire A.

Mr. and Mrs. Benjamin W. Franklin and their daughter, Mrs. Jean Sproston, viewing a part of their Birmingham herd and buildings through the window of their home. The home, main farm and buildings have been sold to the Canadian government, which brings about the necessity for this near dispersion.

Welcome to Birmingham Farm

We wish to extend to you a most sincere invitation to visit us here at Birmingham Farm for our Near Dispersion sale on Monday, June 25. We believe as never before in the annals of the Shorthorn breed, both Shorthorn and Polled Shorthorn breeders are realizing the tremendous importance of the Polled branch.

We had reserved the date of June 25 for a pro-

duction sale. However, to our surprise, circumstances have arisen whereby we must sell about three times as many cattle as we had originally planned.

We hope as many of you as possible will be able to arrive the day before, so that you can see this great offering at leisure, and enjoy the fellowship of the many fine people who are breeding Shorthorns and Polled Shorthorns.

Benjamin W. Franklin

FRANK LAING, Herd Manager

DON CLARK, Herdsman

Sale Starts

At 11 A. M.

**EASTERN
DAYLIGHT
TIME**

Due to the large number of cattle to be sold, please keep in mind the early starting hour of 11 a.m. The auctioneers will receive instructions to sell the cattle quickly. Comment should be unnecessary because most of it is mentioned in the catalog. We plan to take a leaf from the book of the great Perth sales in Scotland, where we understand the Perth champion is sold in three minutes time. Despite the large offering, this sale will be concluded early.

The Program of Birmingham Farm Shorthorn

Three of our imported cows. Millhills Broadhooks 14th, on extreme right, is the dam of Lot 50.

It was a surprise, to say the least, when we learned that the Government of Canada wished to acquire the main farm of Birmingham Farm and some surrounding lands for the purpose of erecting a large institution. While we have some farms left, the Government has purchased the land on which stands our home, our Herd Manager's quarters, and our main barns. These barns accomodated through the winter some 150 head of cattle.

After nine years, we were on the verge of our objective of producing a Shorthorn with the best blood of Scotland, but with the added advantage of the Polled head.

Since last autumn we have sold Polled

and Polled Shorthorn Project

Shorthorns to three of the top shorthorn herds of Scotland and a Polled bull to the Government of new South Wales, Australia. Recently, we have also seen Birmingham blood introduced into some of the great Shorthorn herds of Ontario.

We also had the top selling Shorthorn at the 1955 Sale of Stars at the Royal Winter Fair, Toronto, where Birmingham Orbit 2nd sold for \$3,000 to McIvor Bros., Ebor, Manitoba. This bull was of straight horned breeding.

This Near Dispersion of our entire herd will benefit many breeders throughout the world, who wish to share in our efforts of the past nine years. However, we are thankful to state that this project will continue to its ultimate objective in a much reduced

manner, for the present. This will be accomplished in conjunction with the Joyceton Polled Shorthorn herd which we have been building up for the Honorable G. Peter Campbell. We are keeping a few of the old foundation cows and some stock of our own production.

It was our original intention to list all of the animals we were keeping in the June 1 issue of The Shorthorn World, to assure everyone we were not holding back any breeding or families that we were not selling. We may still be able to supply this information for that issue of The Shorthorn World, but the pressure of work in connection with this sale and the closing date of that issue may prevent it. We will be happy to show you what will remain at Birmingham. We are not keeping a single animal whose family is not represented in our June 25 Near Dispersion.

The Formula Used At Birmingham

to produce a Shorthorn with the best blood of Scotland, but with a Polled Head.

There is nothing complicated about this formula. What it does take is an outlay for a large number of the very best imported females, plus years of patience and hard work.

Bull Calves

Imported cow 100% imported Scotch blood
Polled bull 0% imported Scotch blood
100%

Since the resulting bull calf carries an equal number of the genes of its sire and dam, this figure must be divided by two, producing a calf carrying 50% imported Scotch blood.

We then mate this Polled calf carrying 50% imported Scotch blood to another imported cow.

Polled bull calf 50% imported Scotch blood
Imported cow 100% imported Scotch blood
150%

Dividing by two gives us a Polled bull calf carrying 75% Scotch blood.

We take the resulting Polled bull calf and mate it to an imported cow or a Birmingham bred Shorthorn female of imported sire and dam.

Imported cow 100% imported Scotch blood
Polled bull 75% imported Scotch blood
175%

Dividing by two gives us a Polled calf of 87½% imported Scotch blood. This can be carried one step further to obtain a calf that is 92.75%.

To some this may sound simple. To others it may seem impossible. It is neither simple nor impossible. One thing is for certain, it cannot be done successfully unless the finest Shorthorns are used — and experts agree that our importation was one of the finest in history. True, along the line we have mated 50% animals together, 75% animals together, but we have never lost sight of our original goal to mate 87½% animals together and 92.75% animals together.

Is all this a dream or an accomplished fact? Study the pedigree or a bull like Birmingham Dauntless 2d x (Reference Sire D) for the answer to this question.

Ask yourself this question. Which is it easier for me to do — buy a group of outstanding imported animals and attempt to start a project like Birmingham myself, or capitalize on the years of work and expense put forth by Birmingham by making selections in this sale, which is practically a dispersion of the Birmingham project?

Heifer Calves

Imported cow 100% imported Scotch blood
Polled bull 0% imported Scotch blood
100%

Giving us a resultant Polled heifer calf of 50% imported Scotch blood. This Polled heifer calf we mate with an imported or imported-in-dam bull with the following results:

Imported bull 100% imported Scotch blood
Polled heifer 50% imported Scotch blood
150%

Giving us a Polled heifer carrying 75% Scottish genes.

We then mate this heifer to another imported-in-dam or imported bull for the following result:

Imported bull 100% imported Scotch blood
Polled heifer 75% imported Scotch blood
175%

Giving us a Polled heifer of 87½% imported Scotch blood. This can be carried one step further to produce a calf of 92.75% Scotch blood.

***These Countries
Have All Purchased
Birmingham
Polled Shorthorn
The Birmingham
Project Is
Known The
World Over.***

Because the Birmingham program is different from any other, it has received the attention of cattlemen the world over. In the past year, we have sold Birmingham productions to three of the leading breeders of Shorthorns in Scotland and to the Australian government.

These cattle were selected as foundation material for great new herds of Polled Shorthorns, only after long searches. Polled Shorthorn breeders have the world market at their door. However, cattlemen are interested in a Polled animal with a great Scotch background. It is unfortunate that Birmingham must reduce its own operation. Will you be one of those astute cattlemen who will take advantage of this opportunity to be a source of supply for the blood that is in demand throughout the world ?

General Sale Information

Time — Sale starts promptly at 11:00 a.m. Eastern Daylight Time, Monday, June 25, at Birmingham Farms, 11 miles northeast of Kingston on highway 15.

Guarantee — All cattle will be sold under the guarantee printed on page 106 of this catalog. Where breeding dates do not appear in the catalog, they will be announced on sale day. Information announced from auction block supercedes any material in catalog.

Health — All cattle will be tested for T. B. and Bangs within 30 days of the sale. Official calfhood vaccination for Bangs has been practiced at Birmingham since the herd's inception. Health charts and information necessary for proper export will be supplied.

Terms — The terms of this sale are cash. Settlements to be made for the cattle with the clerk immediately following the sale.

Auctioneers — J. E. Halsey, Des Moines, Iowa; C. D. Swaffar, Tulsa, Oklahoma; Duncan Brown, Shedden, Ontario.

Liability — Although every precaution will be exercised to protect the safety and comfort of those attending, Birmingham Farm cannot assume any liability for accidents that may occur. Accidents at cattle sales are rare, but all attending must assume liability to themselves. The auctioneers, clerks, or sale manager can assume no liability for accidents, for payment of the cattle, for delivery of the cattle, or for transfer of the pedigrees. The sale manager was retained by the owner for the specific purposes only of handling the advertising, publicity, preparation and distribution of the catalog. The sale manager has nothing to do with the handling of the cattle, the condition of the premises, or the transfer of pedigrees.

Transfer of Pedigrees — Upon payment of the final and successful auction bid price, the owner, Benjamin W. Franklin, will transfer the pedigrees to the new owner. The transfer will be made on the Canadian registry certificate. All such animals are eligible for registry in the American Shorthorn Breeders' Association Herd Book. A properly transferred Canadian registry certificate will be provided for each lot sold, and an application for registry will be provided for each calf under six months and each in dam unborn calf.

Farm Telephone — Kingston 2-0688.

Sale Manager — Don Longley, 16 So. Locust St., Aurora, Illinois. Phone Aurora 6-8511.

Mail Bids — Mail bids may be sent to any of the following representatives who will attend this sale or to the auctioneers or sale manager: Harold White, Secretary, Canadian Shorthorn Breeders' Assn., Gummer Bldg., Guelph, Ontario; E. H. Stoltz, Eastern Representative, Canadian Shorthorn Breeders' Assn., Aurora, Ontario; C. K. Tomson, Harding & Harding, Geneva, Illinois. Last minute phone calls or messages may reach any of these men at the farm phone above or the LaSalle Hotel in Kingston. Those who submit bids may be assured that their bids will be honestly and faithfully executed with the sole thought of purchasing the cattle the buyer needs at the lowest possible price.

Sale Headquarters — The LaSalle Hotel in Kingston is a modern first class hotel and will be sale headquarters. We will make reservations for you there if you wish. There are a number of good motels in the area for those, who prefer to stay in a motel.

Delivery of Cattle — We wish to cooperate in every possible way with buyers in helping them get their purchases home at the least possible cost. Good truckers are available. We will also help you combine your shipment with others going in the same direction. If it is helpful to the buyer, we will keep your purchases at Birmingham Farm for a reasonable period of time necessary for you to make shipping arrangements after you get home.

Registry in American Herd Book — Practically all of the cattle in this sale can be registered in the American Shorthorn Herd Book without the payment by the buyer of the extra fee imposed by that association on cattle imported from Scotland. All of our imported cattle were brought in before this fee was increased from \$100 to \$200, so in cases where this fee would be applicable it would be the lesser amount. We plan to provide further information on this subject on sale day.

REMEMBER THE EARLY STARTING HOUR — 11:00 A.M. — EASTERN DAYLIGHT TIME

LUNCH WILL BE PROVIDED BEFORE AND DURING SALE

This is an old map. The new 1000 Island Bridge crosses the St. Lawrence about 25 miles east of Kingston. To reach this bridge come through Watertown, New York, which is 25 miles east and 30 miles south of Kingston.

Bring the Family . . . It's A Beautiful Trip

Birmingham Farm is readily accessible both by train and by motor. It is situated 11 miles north east of Kingston on Highway No. 15, which connects Kingston and Ottawa, Canada's Capital City. It is also close to the northern border of New York State. Those motoring via that state should cross at the 1000 Island Bridge, near Gananoque, the Gateway to the 1000 Islands. Those motoring from the South take New York Thruway to Utica, and then No. 12 to Watertown. Those from the West leave New York Thruway at Syracuse and take No. 11 to Watertown.

For those coming by train you can leave Chicago, for example, at 8:10 p.m. C.S.T. arriving Toronto 8:55 a.m. E.S.T. and arriving Kingston 1:32 p.m. E.S.T. Returning after the sale you can leave Kingston at 6:47 p.m. E.S.T. arriving Toronto 9:45 p.m. E.S.T. and arriving Chicago 7:25 a.m. C.S.T.

Those coming by plane or train should plan to arrive the day before the sale, since there are no train facilities from Toronto in the morning that would get you there for the start of the sale.

It is 166 miles from Toronto to Kingston. It is 125 miles from Birmingham Farm to Ottawa. Toronto or Ottawa can be reached easily by commercial airlines from any point in a matter of a few hours. At Kingston there is the Norman Rogers Airport with good radio and landing facilities for those who wish to come by private plane.

We will be happy to do anything we can to make it easier for you to get to this sale. We will have cars at the LaSalle Hotel to take you to the farm and bring you back on sale day and the day before.

Plan to be with us on the day before the sale.

Very few people realize the amount of capital, hard work and patience that has gone into the Birmingham Shorthorn-Polled Shorthorn project to bring it to the point where it is today. Ben Franklin set forth on a tremendous undertaking. It was not his objective to merely make one cross of imported Scottish blood into a Polled Shorthorn pedigree. It was his aim to produce Polled animals as good as the best horned animals in Scotland, with the Polled factor dominant, and yet still carrying over 90% of the genes of his imported animals.

At his 1953 sale, he had a few animals that carried two crosses of the imported animal. Today most of his productions have reached this 90% point. While it is necessary for him to reduce the size of this operation, I am delighted that this project will be carried to further fruition by him in cooperation with Senator G. Peter Campbell.

Since his project has reached this point, it will be possible for him to continue towards his goal with fewer animals. It would not have been possible for him, or anyone else, to attempt this undertaking at the outset with a small number of cattle to work with. He started with 31 of the finest imported females anyone ever laid eyes on, plus some excellent Canadian Shorthorns, and some top Polled animals from the United States. Both ends of the herd, Shorthorn and Polled Shorthorn, were carefully expanded, until today there are approximately 200 head at Birmingham. 160 of these sell in this sale, leaving him with a comparatively small number, but which will be combined with Senator Campbell's fastly rising Joyceton herd, built entirely around Birmingham bloodlines.

The point is that here is an opportunity for breeders everywhere, Shorthorn and Polled Shorthorn alike, to capitalize on

A pair of Millhills Calrossie Leader 2nd daughters, bred at Birmingham and selling in this sale.

this man's vision and hard work — and to do it with a fraction of the capital outlay he needed to start this project, and with an even greater promise of return, because of the years of effort that have gone before.

It isn't very often that one finds shortcuts in this business of raising purebred seed stock. Here is one that you shouldn't miss.

Don Longley
SALE MANAGER

P. S. — These cattle will not be fat. Up until the end of April they thought this would be a production sale of 45 lots.

Polled Future in Canada - - and Elsewhere !

*Something
to
think
about*

For those who do not understand
Polled pedigrees — the letter “x”
denotes the animal is polled.

Everywhere Polled Shorthorns are gaining in popularity. I don't know what the American Shorthorn Breeders' Association figures are, but I do know that here at The Shorthorn World about 30% of our United States business is done with Polled Shorthorn breeders.

When Birmingham was founded, there were practically no Polled Shorthorn breeders in Canada. The number has grown — faster than most people had expected, but the number of Polled Shorthorns available is only a drop in the bucket to the tremendous market potential of this branch of the breed. The potential for those who will establish herds now, particularly along bloodlines that are known and popular among cattlemen everywhere, affords a growth factor that few businesses of any kind can look forward to.

Polled Shorthorns are an integral part of the Shorthorn breed. The spirit of cooperation and friendly interest between Shorthorn and Polled Shorthorn breeders in the area I travel has been wonderful. After all, they are becoming each others best customers, because Polled Shorthorn breeders recognize the importance of introducing outstanding Shorthorn blood, and many Shorthorn breeders are thinking along the lines of incorporating some good Polled animals in their herds.

It is a double barrelled mechanism for breed expansion.

Don Longley of The Shorthorn World.

Birmingham Control — We feel that in producing this bull we can prove to the world that the Shorthorns being raised at Birmingham are among the best anywhere. Through the mating of the Calrossie Alpha Ramsden family with our great sires Cruggleton Banker and Millhills Calrossie Leader 2nd, we have a replica as great or greater than the famous grand-sire of this bull, Millhills Champion. Birmingham Control now takes his place as the Number 1 Shorthorn sire at Birmingham. We have a number of calves that prove his ability beyond doubt. Most of our straight horned females selling in this sale are bred to him or have calves at foot by him, and we have also mated him to some of the polled females.

Birmingham Nugget 3d x.

Birmingham Nugget 3rd x — This is the bull purchased by the Australian government to be used as a source of improving Polled Shorthorns in that great cattle country. His pedigree clearly illustrates our program of producing Polled Shorthorns that trace on both sides of their pedigrees to the greatest blood of Scotland. Notice that five of his great grand parents were bred in Scotland, and three of his four grand parents. This bull is a proven 100% dehorner. His calves prove that you can raise Polled Shorthorns with that Scottish Shorthorn quality. This bull was sold last fall and delivered early this spring. He was sold with the understanding that a supply of semen could be retained, and we have continued to mate females to him right up to the present time. A large number of the polled females in this sale are bred to this 100% dehorner as well as many of the Shorthorn females in the group from lots 97 to 131 that have a polled cross in their pedigrees. 27 females sell bred to him, ten have calves at foot by him.

Birmingham Orbit 2d x. This son of Cruggleton Banker topped the 1955 Sale of Stars, Royal Winter Fair, selling for \$3000 to McIvor Bros., Ebor, Manitoba. He is typical of the quality, character, and ruggedness of the get of Cruggleton Banker.

Cruggleton Banker — This dark red, imported-in-dam son of the Perth champion, Cruggleton Account, has seen a very heavy service in the past three years. Already he is becoming known as a great herd sire. He is considered by leading Scottish breeders and North American breeders who have traveled extensively in Scotland to be the best breeding son of the Perth champion, Cruggleton Account. One of his first sons, Birmingham Orbit 2nd, caused tremendous interest at the 1955 Royal Winter Fair where he topped the Sale of Stars at \$3,000 going to McIvor Bros., Ebor, Manitoba. This bull is also the sire of Birmingham Control, Birmingham Dauntless 2nd x, and Birmingham Raglan used in our herd. Many cattle in this sale are sired by him, and we can not praise too heavily his influence in our herd.

Birmingham Dauntless 2d x.

Birmingham Dauntless 2nd x — We feel this outstanding young bull represents the greatest achievement in our goal to produce the best blood of Scotland with a polled head. Scottish interests have offered attractive prices for this bull, but we believe he should stay here. This sale will afford the first opportunity to buy his blood. He has been mated already to 18 of the females in the sale, more by sale day. Note his dam is a half sister to the dam of Birmingham Nugget 3rd x. His sire and dam were both bred at Birmingham. Of his four grand-parents, two were bred at Birmingham, two in Scotland. Of the eight great-grand-parents, six were bred in Scotland and the other two crosses are of our famous Fascinator Standard x. His calves will be in demand everywhere.

Birmingham Nugget x

Birmingham Nugget x — Another polled bull that has had a fine influence upon our program. Many of his daughters sell. He is the sire of Birmingham Nugget 3rd, the bull that we sold to the Australian Government. This polled son of Millhills Calrossie Leader 2nd is out of one of our greatest producing cows, and she was out of a full sister to Lynnwood Nugget x. A combination of the best blood of Scotland with the best of American Polled Shorthorn breeding.

Ascreavie Democrat (328591). Sire, Lawton President Roosevelt (308482) by Collynie State Express (286968) out of Lawton Princess Jane. Dam, Calrossie Augusta Pat by Calrossie Randolph (275440).

Collynie Elect (286949). Sire, Aldie Conqueror (261324) by Calrossie Satisfaction (249387) out of Gladys Cooper. Dam, Collynie Eliza 15th by Rosehaugh Victor (239950).

FASCINATOR STANDARD X

Top Sire of the Breed in the Ontario Advanced Registry Tests

The following figures are taken from Circular No. 223, a report of the Ontario Advanced Registry for Beef Cattle, by the Department of Animal Husbandry, Ontario Agricultural College and the Ontario Livestock Branch.

The first twenty beef sires to complete the test, made the following AVERAGE records:

COMPARE

Average Record	Initial Weight	Final Weight	Average Daily Gain	Grain Per Pound Gain	Carcass Score
of first 20 sires	474.6	841.1	1.85	6.30	67.7
Fascinator Standard x calves	463	932	2.23	5.60	78.5

Fascinator Standard x, a Polled Shorthorn bull, has proved to be the highest beef Shorthorn sire to complete this test to date.

The calves tested were raised in the herds of Duncan Brown, Shedden, and Harvey Kendall, Iona Station, the present owners of Fascinator Standard x. Naturally, we are proud that a Polled Shorthorn sire could top them all. We are happy, too, for Messrs. Brown and Kendall, because like many of the bulls we have sold, he was placed there for a specific purpose.

Our original purpose in buying Fascinator Standard x was twofold. We wanted a potent 100% dehorner to mate to our imported cows to produce Polled bulls and females that would mark the first step of our project. We also wanted a bull that could produce substance and doing ability. A study of our pedigrees will reveal Fascinator Standard's important role in this project. With his Polled sons and daughters out of imported cows to work with, we were then able to spare him to the fine use that has been made of him in these two good herds.

Reference Sire G

Fascinator x 2016414. Sire, Collynie Fascinator x 1957471 by King Collynie Jr. x 1718025 out of Cumberland Foxglove. Dam, Augusta 108th by King Collynie Jr. x 1718025.

Browndale Referee x 1877848. Sire, Sultan's Standard x 1582689 by Beauty's Sultan x 1282362 out of Lavender's Rose 2nd. Dam, Lady Clipper by Loyal Browndale 1464108.

Sultan's Standard x 1582689. Sire, Beauty's Sultan x 1282362 by Sultan Masterstroke x 555455 out of Type's Beauty. Dam, Lavender's Rose 2nd by Matchless Goods x 785640.

Fascinator Standard x was the 100% dehorning herd sire that we used for the most part to start the Birmingham Farm Polled Shorthorn Project. He possesses in full measure that combination of size and quality that has been our objective right along. He fulfilled his missions of producing polled females from our imported Scottish and our Canadian horned cows. He also produced such bulls as Birmingham Millhills Democrat x, Birmingham Democrat 2nd x, Birmingham Calrossie Randolph x, and Birmingham Scotston Wanderer x.

The head of Fascinator Standard x, the great 100% dehorner used in the initial stages of the Birmingham project.

Fascinator Standard x — Was the 100% dehorning sire that we used for the most part to start the Birmingham Farm Polled Shorthorn Project. He possesses that combination of size, quality and fleshing that is so essential. He fulfilled his mission of producing polled females and bulls from our original imported Scottish and Canadian horned cows, and we then sold him to Duncan Brown, Shedden, Ontario and Harvey Kendall, Iona Station, Ontario. At thirteen years of age, he is still going strong. The list of outstanding cattle he has produced is too long to enumerate, but is clearly evidenced through the pages of this catalog.

Birmingham Embarker x.

Birmingham Embarker x — This is the bull selected by Duncan Stewart of the famous Millhills Shorthorn herd in Scotland. It was his intention to use this great young bull to mate to top members of the Millhills herd for the foundation of the Polled Shorthorn breed in Scotland. The entire Shorthorn fraternity was shocked at the death of this famous breeder early in May. We do not wish to ask his estate to finalize the transaction, and so are offering this great young bull to the public as a feature of this partial dispersion of our herd. We can spare this bull only because our numbers will be reduced after this sale.

White Oak Rothes x — Grand champion bull at the Indiana State Fair. This bull was a stock bull at Lynnwood Farms, and we obtained him from Lynnwood about two years ago to fulfill a specific purpose in our polled project. Among the many winners he sired for Lynnwood was the first prize senior yearling heifer at the 1955 International. This bull is a polled grandson of the Perth champion, Royal Rothes. He is a 100% dehorner. A number of his sons and daughters are included in this sale and they show clear evidence of his ability to sire tops. Although this bull has some age, he still can be of good use towards furthering someone's ambition to climb to the top brackets of the Polled Shorthorn fraternity.

Bull

White Oak Rothes x, in two year old form.

Lynnwood Patience x. This daughter of White Oak Rothes x was the first first prize senior yearling heifer at the 1955 International and the reserve senior champion at the 1955 National show in Des Moines, Iowa.

The Shorthorns Bred At Birmingham

Female lots 11 through 49 are representatives of the straight horned breeding program at Birmingham. This is a very important part of the project. They act as the "machine tools" for our continued Polled Shorthorn improvement. Each year we mate a number of our original imported cows and their straight Scotch daughters to our imported-in-dam horned bulls. Lots 11 through 49 are the result of eight years of such careful matings.

We started with our great importation of Scotch females. To reproduce the mothers, two imported-in-dam sires were used, Millhills Calrossie Leader and Millhills Calrossie Leader 2nd. We followed with daughters of this cross by mating to Cruggleton Banker, our imported-in-dam son of the Perth champion, Cruggleton Account. This cross worked beautifully giving us such bulls as Birmingham Control and Birmingham Raglan.

We are not believers in a great deal of exhibiting, but when we do exhibit we believe it safe to state that Birmingham Shorthorns get their share of the honors. For example, we had the top selling bull of the 1955 Sale of Stars with Birmingham Orbit 2nd, purchased by McIvor Bros., Ebor, Manitoba, for \$3,000. Our heifer, Birmingham Secret Dorothy 2nd, placed first in a class of 32 at the 1955 Royal Winter Fair.

We believe sincerely that this offering of horned females can help any Shorthorn herd, Horned or Polled.

These are three of our imported cows. They are typical of the 31 imported females we selected in Scotland to found the Birmingham Shorthorn-Polled Shorthorn project.

Birmingham Jealousy 3d x. At \$3500 she topped the Polled females in our 1953 sale, going to Lynnwood Farms, Carmel, Indiana. She is out of lot 11, Millhills Jealousy 16th.

Millhills Jealousy 16th — This imported-in-dam cow has quite a history. She sells with bull calf at foot by Birmingham Raglan. The calf will be six months of age at the time of sale. She has been rebred to Birmingham Raglan as of March 31st, 1956. She is the dam of Birmingham Jealousy 3rd x, the top selling polled female in our 1953 sale at \$3500 to Lynnwood Farm. She is also the granddam of Birmingham Nugget 3rd x, the bull sold to the Australian Government, of New South Wales.

Birmingham Secret Dorothy 2nd. Lot 14. She clearly illustrates that our Birmingham Shorthorns, raised principally to supply continued strength to our Polled Shorthorn project, are among the world's finest Shorthorns. This heifer topped a class of 32 senior heifer calves at the 1955 Royal Winter Fair, Toronto.

Birmingham Secret Dorothy 2nd — At the 1955 Royal Winter Fair this heifer swept the class of thirty-two senior heifer calves. We imported her granddam Millhills Dorothy 6th from Scotland, and she sold in our 1953 sale to Mr. Reford Gardhouse, Milton Ontario. Her great-granddam, despite her beef type, was put on test in Scotland by the late Mr. Duncan M. Stewart. She gave nearly 9000 pounds of milk. **We have bred this great heifer to our young polled herd sire Birmingham Dauntless 2nd on April 29th, 1956.** What an opportunity to get a great polled calf!

Lot 15

Female

BIRMINGHAM LUXURY 4th

—463606—

Tattoo NWV K19 rt. ear

Red, born April 9, 1955.

Bred by Benjamin W. Franklin, Kingston, Ont.

Birmingham Luxury 4th — Here is a daughter of a full sister of Millhills Champion. She **sells open**, and has as fine a pedigree as can be found anywhere.

BACK TO THE COUNTRY OF HER ORIGIN . . . BUT WITHOUT HORNS

Picture taken in 1953 of Birmingham Secret 2d x as a calf. This daughter of Birmingham Nugget x was purchased recently from us as a foundation for a Polled Shorthorn herd in the great Bapton Shorthorn herd in Scotland. She is shown with her mother, Millhills Secret 10th, purchased in our 1953 sale by Louada Farms for \$3500. Lot 18 is out of a daughter of Millhills Secret 10th. Millhills Secret 10th was also the dam of our sire, Millhills Calrossie Leader 2nd and is the dam of Edellyn's herd bull, Louada Grand Duke.

Lot 18**Female****BIRMINGHAM SECRET 4th**
—450486—

Tattoo NWV J16 rt. ear

Dark roan, born April 23, 1954.

Bred by Benjamin W. Franklin, Kingston, Ont.

Birmingham Secret 4th — This granddaughter of Millhills Secret 10th needs no explanation as to pedigree. Millhills Secret 10th was the top selling horned female at our 1953 sale at \$3500 to Louada Manor Farms, Ltd. A son of hers is in use at the famous Edellyn Farms. A daughter is in the herd of Mr. Cyrus Eaton's Acadia herd. She was **bred to Birmingham Control, October 13, 1955.**

The Birmingham Polled Project

We believe the future of our great Shorthorn breed lies in the production of outstanding Polled cattle. The farmer prefers them and will pay a premium for them. On our Western range, the government imposes substantial discounts for cattle coming to market with horns. This has caused many of our Western ranchers to start thinking about the Polled gene.

We believe, just as thoroughly, that Polled cattle can be no better than the Horned ancestry from which they spring. We started with the original idea of taking the greatest Shorthorns we could obtain and reproducing them in Polled form. We backed our idea with a large capital outlay to obtain 31 of Scotland's best females. We have never deviated from our course. We have not been satisfied with one simple cross, but have mingled this blood carefully, generation after generation, until today we are producing Polled Shorthorns with individuality and background obtainable nowhere else in the world.

Lots 50 through 94, 45 Birmingham Polled females, represents the largest draft of Birmingham Polled females that ever has, or ever will be offered for sale at one time. Because of the sale of our main farm to the Canadian Government, we are selling brood cows and heifers, that never, under any other circumstances would have been offered to the public.

It is not necessary to comment on these pedigrees. Any student of pedigrees can readily appreciate what has been done to create this kind of Polled Shorthorn. We cite as a typical example, the close at hand pedigree of Lot 51, Birmingham Broadhooks 3rd. This heifer, like many others in this sale, has for her eight great-grand-parents six Scottish animals. If you think this is an easy accomplishment, we suggest you try it. An easier way, and a way that will save you tens of thousands of dollars, and many years time, would be to buy a selection of these here offered at auction.

Right, one of our imported cows with her Polled calf.

Horned Females with Polled Breeding In Their Pedigrees

Our program of developing Shorthorns with the best blood of Scotland, but with a Polled head, is different from any other herd in the world. We are producing Polled Shorthorns that trace in all generations to these great Scottish imported cattle. Before a Birmingham Polled bull can take his place as a senior herd sire, we must first determine if he is a 100% dehorner.

It is only natural in this process, that over the years, we would have some cattle bred to be Polled that came Horned. The group of females from Lots 97 thru 131 fell in this category.

Up until now, we have never sold any from this group. We have considered them valuable breeding animals, but since the Canadian Government has purchased our main farm and buildings we are cramped for space and they must be sold.

These females in many cases are outstanding individuals and carry fine pedigrees. They have calves at foot and are mated to 100% proven dehorning bulls — bulls like White Oak Rothes x and Birmingham Nugget 3d x, purchased recently by the Australian Government. Some have been bred to Birmingham Dauntless 2d x, the

A group of yearling heifers by Cruggleton Banker. All sell. Some are in the straight Scotch Shorthorn group (Lots 11 through 49). Some are from the group with a Polled cross in their pedigree (Lots 97 through 131).

best Polled bull we have yet raised. Anyone now in the Polled business, or considering starting, will do well to purchase some of these females. They are assured, where pointed out, of a Polled calf. These females will all be born branded with an X preceeding the number on the horn.

Briardale Princess Delicia 3rd. Tied for top selling female honors at the 1954 International Shorthorn sale in Chicago. She was sold by Col. Beardmore, Briardale Farm, Mono Mills, Ont. for \$2700 to Ashbourne Farms, Prospect, Kentucky. Her dam is out of Glassingall Delicia, the same as Lot 131. Lots 129 and 130 and other members of this family sell.

Birmingham Delicia, Horn Brand x 5 — This cow carries the splendid pedigree of her dam purchased from the famous Briardale herd. She is **bred December 8th, to the 100% dehorner, the Australian bull, Birmingham Nugget 3rd x**. The dam is a maternal sister to the dam of Briardale Delicia 3rd, \$2700 top of the 1954 International Shorthorn sale in Chicago.

GUARANTEE AND TERMS

1. Proper care should be given by purchaser to protect breeding qualities and health of animals. Any cattle in this sale that are fitted for exhibition purposes by their new owners are excluded from the following guarantee.

2. All bulls sold as separate lots are guaranteed breeders. If bull when sold is 14 months of age or over and fails to breed, he must be reported within 6 months. If under 14 months of age when sold and fails to be a breeder, he must be reported at the time he attains the age of 20 months. A bull shall not be allowed to serve when under 14 months of age or be allowed to run with the herd when under 20 months of age.

3. Cows sold with calves by side are considered proven breeders. All other cows and heifers sold as a single lot are guaranteed breeders, except calves sold by side of dam as one lot and heifers under 16 months of age at time of sale. Heifers shall not be served for first calf by heavy or old bull. Cows and heifers over 3 months gone in calf, according to service date furnished at time of sale, but not proving in calf, must be reported to seller within 3 months from date of sale; all others served within 3 months of date of sale not proving in calf or not settled must be reported within 6 months. Heifers not settled when 22 months of age shall be promptly reported. Heifers over 16 months of age sold open, not settling within 6 months of date of sale, shall be promptly reported.

4. Any animal not proving up to foregoing guarantee shall be replaced with another of equal value at the time of purchase to the

satisfaction of the purchaser, or the purchase price will be refunded at the seller's option, but the seller may, if he desires, have the animal returned for retrial after a period not to exceed six months. The expense of return freight in such case is to be paid by the seller. If the animal is proved to be a breeder beyond doubt, it shall be returned to the purchaser at his expense. In case the animal proves to be not a breeder, then the purchaser shall be given the option of having purchase price refunded without interest or of accepting a substitute as stipulated above. Salvage to go to the seller. No charge for feed or maintenance shall be made by either buyer or seller.

5. Animals sold become the property and risk of their new owners as soon as bid off. Terms of sale are cash. Settlements to be made with clerk immediately following the auction. The sale of each animal becomes a contract between the buyer of each animal and the seller, and the seller agrees to deliver a free and clear title by means of proper registration transfer of each animal.

6. A certificate of registry in the Canadian Shorthorn Herd Book for each lot will be transferred by Benjamin W. Franklin, owner, to the new owner upon payment of successful bid price in this auction. Any animal in this sale can be registered in the American Shorthorn Breeders' Herd Book.

7. Information appearing on page 10 is to be considered a further part of the guarantee and terms of this sale.

**ten years of carefully mating Scotland's greatest blood
with the polled gene, has brought birmingham to
its present point of raising polled shorthorns
obtainable nowhere else in the world.**

**the necessity for this partial dispersion affords
shorthorn and polled shorthorn breeders an
opportunity that has never before and may never
again be offered to the public.**
